

11**Clarification on taxability of printing contracts****Circular No. 11/11/2017-GST****20th October 2017**

Requests have been received to clarify whether supply of books, pamphlets, brochures, envelopes, annual reports, leaflets, cartons, boxes etc., printed with design, logo, name, address or other contents supplied by the recipient of such supplies, would constitute supply of goods falling under Chapter 48 or 49 of the First Schedule to the Customs Tariff Act, 1975 (51 of 1975) or supply of services falling under heading 9989 of the scheme of classification of services annexed to notification No. 11/2017-CT(R).

2. In the above context, it is **clarified** that supply of books, pamphlets, brochures, envelopes, annual reports, leaflets, cartons, boxes etc. printed with logo, design, name, address or other contents supplied by the recipient of such printed goods, are composite supplies and the question, whether such supplies constitute supply of goods or services would be determined on the basis of what constitutes the principal supply.
3. Principal supply has been defined in Section 2(90) of the Central Goods and Services Tax Act as supply of goods or services which constitutes the predominant element of a composite supply and to which any other supply forming part of that composite supply is ancillary.
4. In the case of printing of books, pamphlets, brochures, annual reports, and the like, where only content is supplied by the publisher or the person who owns the usage rights to the intangible inputs while the physical inputs including paper used for printing belong to the printer, supply of printing [of the content supplied by the recipient of supply] is the principal supply and therefore such supplies would constitute supply of service falling under heading 9989 of the scheme of classification of services.
5. In case of supply of printed envelopes, letter cards, printed boxes, tissues, napkins, wall paper etc. falling under Chapter 48 or 49, printed with design, logo etc. supplied by the recipient of goods but made using physical inputs including paper belonging to the printer, predominant supply is that of goods and the supply of printing of the content [supplied by the recipient of supply] is ancillary to the principal supply of goods and therefore such supplies would constitute supply of goods falling under respective headings of Chapter 48 or 49 of the Customs Tariff.

12**Clarification regarding applicability of GST on the superior kerosene oil [SKO] retained for the manufacture of Linear Alkyl Benzene [LAB]****Circular No. 12/12/2017-GST****26th October, 2017**

Briefly stated, references have been received related to applicability of GST on the superior kerosene oil [SKO] retained for the manufacture of Linear Alkyl Benzene [LAB].

2. In this context, LAB manufacturers have stated that they receive superior Kerosene oil (SKO) from, a refinery, say, Indian Oil Corporation (IOC). They extract n-Paraffin (C9-C13

hydrocarbons) from SKO and return back the remaining of SKO to the refinery. In this context, the issue has arisen as to whether in this transaction GST would be levied on SKO sent by IOC for extracting n-paraffin or only on the n-paraffin quantity extracted by the LAB manufactures. Further, doubt have also been raised as to whether the return of remaining Kerosene by LAB manufactures would separately attract GST in such transaction.

3. The matter was examined. LAB manufacturers generally receive superior kerosene oil [SKO] from a refinery through a dedicated pipeline; on an average about 15 to 17% of the total quantity of SKO received from refinery is retained and balance quantity ranging from 83%- 85% is returned back to refinery. The retained SKO is towards extraction of Normal Paraffin, which is used in the manufacturing of LAB. In this transaction consideration is paid by LAB manufactures only on the quantity of retained SKO (n-paraffin).
4. In this context, the GST Council in its 22nd meeting held on 06.10.2017 discussed the issue and recommended for issuance of a clarification that in this transaction GST will be payable by the refinery on the value of net quantity of superior kerosene oil (SKO) retained for the manufacture of Linear Alkyl Benzene (LAB).
5. Accordingly, it is here by **clarified** that, in aforesaid case, GST will be payable by the refinery only on the net quantity of superior kerosene oil (SKO) retained for the manufacture of Linear Alkyl Benzene (LAB). Though, refinery would be liable to pay GST on such returned quantity of SKO, when the same is supplied by it to any other person.
6. This clarification is issued in the context of Goods & Service Tax (GST) law only and past issues, if any, will be dealt in accordance with the law prevailing at the material time.

13

Clarification on Unstitched Salwar Suits Circular No.13/13/2017-GST

27th October, 2017

Doubts have been raised regarding the classification of Cut pieces of Fabrics under GST.

2. It has been represented that before becoming readymade articles or an apparel, the fabric is cut from bundles or thans and sold in that unstitched state. The consumers buy these sets or pieces and get it stitched to their shape and size.
3. Fabrics are classifiable under chapters 50 to 55 of the First Schedule to the Customs Tariff Act, 1975 on the basis of their constituent materials and attract a uniform GST rate of 5% with no refund of the unutilized input tax credit.
4. Mere cutting and packing of fabrics into pieces of different lengths from bundles or thans, will not change the nature of these goods and such pieces of fabrics would continue to be classifiable under the respective heading as the fabric and attract the 5% GST rate.
